RENE INDIARTO WIDJAJA
Chairman of Board of Trustees

Building Homes, Building Lives

Dear Sir / Madam,

I am touched, proud, and grateful to see how Habitat Indonesia is still nurtured by God to continue serving many people in need. The journey of life is not easy, millions of families in various regions still do not have decent housing.

When a major disaster occurred in 2018, Habitat Indonesia helped rebuild the disaster areas; Lombok, Sigi, Donggala and Palu. In early 2020, when large floods hit Jakarta, Lebak and Bogor, Habitat Indonesia moved quickly to support the needs of refugees with hygiene kits, build temporary shelters and access to sanitation.

A series of disasters ensued and in mid-March, Indonesia was devastated by the Covid-19 pandemic. At a time when many people were about to give up, I am proud that Habitat Indonesia continues to serve and innovate in order to continue its humanitarian mission. I am grateful that Habitat Indonesia can be a part of #IndonesiaMelawanCorona by supporting health workers to be able to find temporary shelter when they were rejected and experienced stigma. Thanks to all Habitat Indonesia employees, donors, volunteers and partners. Hopefully this good cooperation can continue, especially in this difficult situation to serve more people who need a helping hand.

Hopefully Habitat Indonesia can continue to work and be a blessing for the nation and state.

Best Wishes!

Dear Friends, Partners, and Habitat Volunteers,

Praise to God Almighty for giving Habitat the opportunity to serve low-income families in Indonesia to get a better life through various programs.

For more than 23 years Habitat has transformed lives in 17 provinces in Indonesia. The 2020 fiscal year is the most difficult time because since March 2020 the Covid-19 pandemic has destroyed the order of life. The Covid-19 pandemic situation highlights the importance of decent housing as the main protection for families. With the recommendation to stay at home, a decent home is very important to minimize the risk of spreading virus.

The Covid-19 pandemic encourages innovation and adjustment to new life patterns adapted by Habitat Indonesia in every intervention program for the communities. Of course, this noble mission can be realized because of the support of thousands of hands who participate in doing it. Thanks to everyone who has cared to help.

Let us faithfully continue this mission because there are still millions of families in need, so that we can go through the pandemic together. United in heart and hand in hand, we can build a society that is empowered, prosperous, and independent #startfromhome.

Donor Testimonials

Indrawan Masrin

President Director
PT Lautan Luas Tbk

Lautan Luas has been working with Habitat for more than 8 years and many social activity programs were implemented together to improve the lives and welfare of the community.

Habitat helps realize the four pillars of corporate social responsibility programs, especially to the communities around which the company operates.

Hopefully Habitat will continue to progress and develop as a bridge for entrepreneurs to carry out their social responsibility activities to the community.

Jens Reisch

President Director
PT Prudential Life Assurance

To help people get the most out of life, Prudential aspires to contribute to the empowerment and well-being of the communities through a sustainable Community Investment programmes, makes communities safer, more secure and resilient. Driven by a shared aspiration and value to do good and help communities, Habitat Indonesia has been supporting us to help families through various projects, i.e. disaster relief and regional volunteering programme, building houses and renovating schools for people in Yogyakarta and those affected by earthquake in Central Sulawesi and our latest project, Desa Maju Prudential in Mauk, Tangerang. I am personally astonished to see the strong passion embedded in Habitat for Humanity team and I am looking forward to more collaborations ahead.

Thank you.

Donor Testimonials

Chris Bendl

Country Manager
Zurich Indonesia

Zurich Indonesia are pleased to collaborate with Habitat Indonesia to improve the resilience of Indonesia. Our partnership is an integrated community empowerment program through strategic collaboration, where our employee also took part and volunteered their time to support this program.

Habitat Indonesia has given us opportunity to give back and share our expertise to the community. Our employee was very much engaged from fundraising, construction, as well as capacity building.

Our partnership with Habitat Indonesia assures the creation of a strong, resilient community in Dadap Village through our program Kampung Zurich Bersahaja. Through our partnership, Zurich shared our resources and expertise to help encourage strong, more resilience communities, which we believe is one of the key solutions to a more sustainable economy and better quality of life for the community.

Kwik Wan Tien

Chief Executive Officer
PT. Wajah Rejuvenasi Perempuan
Indonesia

The positive impacts that I feel from working with Habitat are:

1. I become more emphatic and aware of the necessity and needs of others outside of my own and my own family's interests.
2. Reports on the use of donated funds are very clear and timely so that as a donor I am not worried that the money given is not distributed properly.
3. The Habitat team's fast response makes the aid arrive on time and this is very important especially in times of a pandemic like this

Habitat has helped Nutrifood's social mission by providing rooms and good facilities for food and transportation for doctors and health workers so that the hospital can work optimally in dealing with Covid-19 patients.

Donor Testimonials

Hilmi Panigoro

President Director
Medco Energy

“I have observed and been very interested in Habitat’s social mission activities since they first came to Indonesia, but my direct involvement only happened a few years ago in conjunction with a sharing program from Thunderbird University alumni that we conducted through Habitat’s Home Building program. Not only financial donations but we also physically involved in the process of building the house as well as interacting directly with the beneficiary’s family. This is a unique experience that makes us feel even more grateful for all the blessing we have received in this life.

The way we are grateful can be different, but basically, we always want to share happiness with the people we love, especially those who are most in need, and I think Habitat’s social activities offer the best way to do this.”

Sera Noviany

Sustainability and Stakeholder
Engagement Manager
APP Sinarmas

Strategies that prioritize community empowerment and also intensive mentoring carried out by Habitat Indonesia help implement efficient and targeted programs. The community is also encouraged to have a sense of ownership of the programs so as to help create sustainable programs in the future. This is certainly in accordance with our CSR mission, which is to create empowered and independent communities, maintain good relations between the company and the community and stakeholders around them, and contribute to the Sustainable Development Goals (SDGs) and programs launched by the government.

Village Improvement Program

Bangka Community Revitalization Program

In October 2017, Samsung Electronics collaborated with Habitat for Humanity Indonesia (HFHI) to rebuild Penagan Village, West Mendo District, Bangka Regency, Bangka Belitung Province. The selection of Penagan village was after discussions with the local government, from the provincial to the sub-district level. Penagan village was established for several reasons as follows:

1. Penagan Village is one of the underdeveloped villages, where the need for housing, access to water, sanitation, health facilities, education and the economy is still very high.
2. Even though it is underdeveloped, Penagan village has high economic potential so that this village will be able to develop quickly if it is assisted.
3. The location of Penagan Village is very strategic in terms of access to raw material providers and is also safe from the threat of a tsunami, because it is far from the coast

Habitat Indonesia conducted a follow-up survey and assessment in February 2017 and has mapped the needs of residents. This survey confirms the survey data conducted by the Central Bureau of Statistics that there are 83% of the houses that are unfit for habitation from a total of 79,000 houses on Bangka Island. Most of the roofs of the houses there are made of asbestos, and do not have access to clean water. This program supports the Bangka Regency Government program called “Bang Jamal”. It stands for Bangka Jamban Layak.

Recitation Park

200 families are provided
with access to clean water

Clean and healthy life
training

Community Development

1. Village Needs Survey
2. Socialization to the Community
3. Establishment of Local Committees
4. Beneficiary Family Selection
5. Public Hearings and Feedback
6. Beneficiary Family Selected
7. Agreements and Commitments
8. Field Implementation

Community Development

- a. Basic construction and healthy home training for 150 people
- b. WASH training for 179 people
- c. Financial education training for 219 people
- d. Livelihood training for 200 people
- e. Capital injection for 6 self-subsistent groups with 152 members.

Activities for Students and Youth

1. Provided 200 Samsung mobile phones for Orphaned Students in Bangka Regency
2. Habitat Young Leaders Build (HYLB) Program: Impacted 571 people: 231 of them received Leadership Academy training and 340 others were involved in project communities resulting from the Leadership Academy
3. The Leadership Academy training was conducted for 2 days for Dian Harapan School, Innovator Reading Park, Mentari Intercultural school, Krida Wacana Christian University, Habitat Indonesia Staff, and 2 public middle schools in Mendo Barat.

The results of what Habitat Indonesia has done and followed up by a third party Impact Study are as follows:

- a. 108 houses have been built according to housing quality standard. One family shared that they usually have to repair the roof every year because it was leaking and now they can save money because they don't need to repair the roof anymore. They also feel safer because the new house is built with a strong structure.
- b. With bathrooms and toilets, many families are now able to shower and defecate where they should be. This is a lifestyle change that is clean and does not pollute the environment.
- c. Before gaining access to clean water, each family had to pay at least Rp. 400.000 per month to buy water. Now, they only need to pay Rp. 32.000 per month for maintenance fee. This access to clean water helps Village-Owned Enterprises (BUMDes) so that they can use development funds to add more pipe installations.
- d. After building toilets in the "Bahrul Ulum" Al-Quran Study Park School, students can concentrate on studying and live cleanly because previously they had to go home if they wanted to defecate. At school there is also a place for "wudu" so that they do not have to walk long distances before praying.
- e. Habitat Indonesia carried out a SOAR (Strength, Opportunity, Aspiration, Results) analysis before implementing this livelihood program. With this process, livelihood interventions can use local resources and ensure the availability of a market space for selling. Eventually it was determined that fish, chicken and mushroom farming are very suitable for the local community.
- f. The availability of cellphones and applications really helped Santo Yoseph High School students learn online during the Pandemic.

The local government, in this case, Bappeda (Regional Development Planning Agency) Bangka Belitung Province, records the statistics of improvements that have occurred, through the following table:

Penagan Mendo Barat Village		Statistics				Source: Bappeda - Bangka Regency	
No	Description	Year				Improvement %	Description
		2017	2018	2019	2020		
1	Poverty Rate	7.72	7.42	6.37	6.07	21%	Poverty rate decreased 21%
2	Number of Student						
a	Primary School	N/A	956	2.145	2.137	224%	Number of student increased >200%
b	Elementary Middle School	N/A	172	470	472	274%	
c	Secondary School	N/A	115	242	240	209%	
3	Income/capita	12.808	13.317	13.794		7%	Increased 7%
4	Health						
a	Diarrhea Case	219	73	31	17	277%	Diarrhea case decreased 277%
b	Stunting Case	32,17	28,61	20,6	9,02	81%	Stunting case decreased 81%

Habitat Indonesia hopes that more companies can be involved in the Village Improvement Program because together we can build a better community / society. If the community / society is developed, the country we love will also be advanced. Long live the Republic of Indonesia.

Data source: Bappeda Bangka Belitung Province

Ennita Pramono, Head of Corporate Citizenship Samsung Electronics

Samsung Electronics Indonesia has been partnering with Habitat for Humanity since 2014. By the time, we are improving our collaboration program so much. Not only building houses but also adopting education program of Samsung Smart Learning Class (school digitalization) and community development program by livelihood trainings targeting local community in order to improve their income and welfare for a better life. It is shown that Habitat for Humanity has always tried their best to embracing their partner by accommodating partners' need and willing to learn and master something new in order to achieve both vision and mission.

A close-up photograph of a hand-operated water pump. A person's hand is visible on the left, operating the handle. The pump is constructed from a grey plastic pipe and a wooden post. A clear plastic bottle is attached to the top of the pipe, serving as a filter. Water is being pumped out of the bottom of the pipe into a blue plastic bucket. The background shows a wooden structure and some greenery, suggesting an outdoor setting.

Water and Sanitation and Hygiene (WASH)

“I have received assistance from Habitat, there is nothing wrong with giving up my land to help more people in need. My land that was previously unused is now more useful. I am content, with this communal toilets, now if I need water I don't have to go far and I don't need to queue anymore” - Rohaeni

Sharing in Simplicity

Water and Sanitation and Hygiene (WASH) di MAUK

Indonesia is committed to meeting the Sustainable Development Goals (SDGs) number 6, namely ensuring the availability and management of safe drinking water and sanitation. It is hoped that access to clean water and sanitation can be fulfilled 100% by 2030. One of the areas that do not yet have access to clean water and safe sanitation in Indonesia is Mauk, Tangerang, where access to drinking water is still 35.60% and sanitation 77.72% (Source: PDAM Tangerang 2018 and 2020).

There are more than 2,500 families in Mauk who don't have toilets. Habitat for Humanity Indonesia with the support of partners has implemented the WASH program in a sustainable manner and has provided dozens of public toilets, water points, private toilets, drainage channels, and hundreds of school toilets.

During mid-2019 to mid-2020, 83 families could be served. This program is expected to reduce residents affected by disease, especially during the pandemic period to minimize the spread of virus as residents can now easily wash their hands.

Disaster Response Program

“Thank you very much Habitat and the donors for providing livable houses. We feel very comfortable and very proud. Previously we could only live in a hut with holes in the walls and a leaky roof but now we can enjoy a nice house, our children and grandchildren are happy because finally they have a comfortable place to study. Tomorrow, if I am given a windfall, I will buy household furniture, new mattresses, tables, chairs, so that guests have a place to sit when they visit the house.”, Fery (46) dan Suwarti (42).

Palu

Earthquake and Landslide

Based on data from BNPB, earthquakes and liquefaction that occurred in Palu, Donggala, Sigi, and Parigi around September 2018 claimed the lives of around 2,113 people. The number of affected families reached around 50,422 families with 24,739 houses were destroyed. This situation is so heartbreaking for all Indonesian people. Habitat Indonesia, together with the support of its partners, was moved to immediately participate in the disaster response since October 2018. On December 2, 2019, Habitat, supported by the Sigi government, laid the groundwork to mark the start of a permanent housing development program for disaster survivors in Sigi Regency, Central Sulawesi. Habitat continues to be present until the reconstruction and rehabilitation stage for disaster survivors' families until September 2020. During mid-2019 to mid-2020 with partners, Habitat carried out missions and has assisted more than 5,000 families by providing 1 communal toilet, 1,684 filtration and clean water facilities, 349 individual toilets, 727 temporary shelters, training for 825 people, and 13 new shelters.

Lebak & Bogor

Floods & Landslide

New year is generally synonymous with expressions of joy and hopes for a better life than the previous year, but who would have thought if what happened in early 2020 was the opposite. Precisely January 1, 2020 at around 05.00 WIB in the morning, the rain that flushed Jakarta and surroundings from night to morning had caused extraordinary floods. The devastating floods hit 5 villages in Lebak. As of January 10, 2020, there were 6 areas affected by the flood, namely Sajira, Cipanas, Curugbitung, Lebak Gedong, Cimarga, and Maja. The flash floods in Lebak and Bogor have devastated residents' homes, made almost nothing left of their property, and claimed many victims. It was recorded that more than 13,000 families or around 60,000 people were affected by the disaster, 3,300 residences were declared missing, and more than 17,000 people had to flee.

For 20 days the survivors remained in a refuge that was far from proper. They are worried that the cold weather conditions will affect the health of the children, especially the children, plus limited hygiene and the threat of dangerous animals entering the evacuation area.

**Abraham Sinatrawan, Head of Corporate Social Responsibility
Chandra Asri Petrochemical**

"Our collaboration with Habitat for Humanity is something we are proud of. Chandra Asri has always been focused on community development programs that have a long-term positive impact because Chandra Asri believes that Our growth needs to go hand in hand with growth in public welfare. Our program with HFH created all of this is possible, and we certainly will always be making HFH our important partner. "

COVID-19

Pandemic

Early March 2020, the COVID-19 virus pandemic that hit the world also hit Indonesia. Within 3 months, the number of infected patients continued to increase to more than 56,000 people. Apart from the general public, those who have lost their lives are health workers who have come face to face with the virus while caring for those who are sick. Also, they have to bear the negative stigma and even rejection when they return home or boarding house because they are afraid of spreading the virus to their family and closest people. They were forced to rest in the hospital by maximizing the makeshift facilities.

Habitat Indonesia participates in supporting Indonesia against Corona by providing proper temporary shelter for health workers in the form of Hotel rooms.

Have helped more than

1821
Health Workers

12 Designated Hospitals for Covid-19

Jakarta:

RSUP Persahabatan
RSPAD Gatot Subroto
RSPI Sulianti Saroso
RSUD Cengkareng
RSUPN Cipto Mangunkusumo
RSU Kab. Tangerang

Surabaya:

RS Siloam
RS Paru
RSUD dr. Soetomo
RSAL dr. Ramelan
RSUD dr. Moh Soewandhie
RS Universitas Airlangga

Drg Bambang Suheri, MAP, Director of RSUD Cengkareng:

“Previously, health workers had to stay at the guest house or return to their homes, which of course was very risky of transmitting the Covid-19 virus to families or the surrounding. This temporary shelter program is very useful in facilitating health workers to get a more proper resting place and a location that is not too far from the hospital ”.

Deny Hendriyatmoko, General Manager of IBIS Budget Daan Mogot:

“The Covid-19 outbreak had impacted on our room sales, which greatly decreased. This temporary shelter program is very beneficial not only for health workers but also for the hotel. Through this program, the hotel has also indirectly helped health workers during the pandemic.

Intan Putri, a nurse for Covid-19 patients at RSUP Persahabatan Jakarta:

“When I started working in the Covid-19 ward, I felt sad because some brothers didn’t want to meet as they were afraid of catching the virus. I am grateful to have a temporary shelter from Habitat and donors so that I can rest and isolate myself safely and comfortably ”.

Rustiana, a cleaning officer for the Covid-19 referral hospital at Cengkareng Hospital:

“I am always filled with fear every time my husband picks me up after work because my job is cleaning the trash in the Covid-19 ward at the hospital, which is very contagious. I am grateful to have a temporary shelter from Habitat to prevent infection for my husband and toddler ”.

*“With the existence of this public toilet, the sense of caring and reminding between neighbors is increasing to maintain cleanliness together, because we are aware that clean toilets encourage more tourists to visit our area if many tourists are visiting, of course, our economic life will be increase,” said **Sahir (51)**.*

Lombok

Lombok Earthquake

In mid-2018, an earthquake measuring around 7 SR hit Lombok. Based on data from the National Disaster Management Agency (BNPB), this earthquake caused 570 people died and 1,893 people were injured. More than 75,000 houses were severely damaged, 33,000 more moderately damaged, and 108,000 more lightly damaged. More than 2 million people have to be displaced.

Habitat Indonesia is actively supporting the local government to rebuild Lombok. Starting from Sajang Village, Sembalu District, East Lombok, NTB, Habitat concentrates on the WASH (Water and Sanitation, and Hygiene) program. During 2019, Habitat has served 1,862 families by providing 1,619 access to water, 297 family toilets, 96 temporary shelters, 1 public toilet, 162 PHBS, and 80 NFI.

Jaruta, a 70-year-old grandfather with a family who was forced to live in a temporary shelter after their house was destroyed by the earthquake, said “Getting temporary shelter from Habitat makes us feel relieved because the permanent housing from the government is still in process and will not be finished shortly”, he said.

Considering that Beleq Hamlet in northern Lombok is one of the most frequently visited tourist destinations, the post-earthquake public toilets were very helpful, especially for tourists who started arriving.

Jakarta

Floods

At the end of 2019, the rain continued to flush Jakarta and its surroundings. It was informed that until January 2, 2020, around 268 areas were flooded. About 18 million people were affected by the flood with more than 62,000 people has been displaced, while 16 people have died. The survivors were forced to live temporarily in refugee camps with limited access to clean water and a very high potential for disease.

This condition encourages Habitat Indonesia to support the government's efforts to cope with floods in Jakarta. Focusing on 4 flood spots that were severely affected, Habitat moved to distribute hygiene and emergency health kits in Kalimalang, East Jakarta. Around 817 hygiene kits were given to 817 families so that while living in the refugee camps, they can maintain cleanliness and good health.

Rohmani, a Jakarta flood survivor who has survived with her family for 4 days at the refugee camp at the University of Borobudur, Kalimalang, East Jakarta, said **“Yes, Alhamdulillah... many thanks I have been helped, I have been rescued. As for goods, I don't think about it anymore, the most important thing is that my life is saved“**, she said.

Budiman, a flood survivor who lives alone in Jakarta and fled after his house was washed away, can only depend on the help sent by other people. Habitat provides hygiene and emergency health kit to Budiman. **“To Habitat and all those who supported, we thank you very much, I hope Allah will give back every kindness given”**, he said.

Habitat Indonesia's Events FY 2019-2020

Housing Forum

Powering Collaboration for Housing

The second time since 2017 Habitat Indonesia (HFHI) has taken part in the implementation of the opening ceremony for the ASIA PACIFIC HOUSING FORUM (APHF). APHF 2019 carries the theme “The Power of Collaboration for Housing Impacts”, which clearly describes its objectives; to encourage more positive collaboration from various parties to accelerate the provision of affordable housing for low-income families in Indonesia. This activity was initiated as an effort to gather stakeholders regarding the provision of affordable livable houses, through an open forum. In this forum, they can share initiatives, new ideas and have the opportunity to collaborate.

This activity covered three sub-events, namely the Research Result Poster Exhibition which was held on July 24-30 2019, followed by a panel discussion which was attended by around 100 participants with academic, professional backgrounds in the housing, corporate, and government sectors. This panel discussion discussed several topics related to proper housing and its challenges in urbanization, how technology can play a role in the effort to provide adequate housing, and of course, the power of collaboration between stakeholders to create decent housing, especially for people in urban areas. After that the series of events closed with field visits by the participants which opened the opportunity for them to see first hand the unsuitable housing conditions and real problems in the community, especially in the Habitat service area in Mauk, Tangerang.

Dr. Julia Dewi, ST., M.T.:

“We hope this activity can open communication to find out what challenges the government has as well as criticism from academics regarding proper housing in Indonesia. Hopefully, this panel discussion can make all parties see their respective positions and see the potential for collaboration to fix housing problems in Indonesia in the future.”

Charity Run

Run for Houses!

Habitat Charity Run is a running competition organized by Habitat Indonesia which aims to encourage people to do good, donate while exercising. Held on August 25, 2019, in an atmosphere of the commemoration of Indonesian Independence, with the spirit of nationalism, Habitat Charity Run carries the theme “I Build Indonesia”.

This event was attended by 900 participants from various backgrounds and was held at Ragunan Zoo, South Jakarta. There are 2 main competition categories, namely running with a distance of 5K and 10K and a category of participants under the age of 10 years with a distance of 500 meters. Participants donate Rp. 20,000- for every kilometer it completes. Donations collected from both contestants and sponsors were used to build houses for underprivileged families in Mauk, Tangerang, Banten. This running competition was enlivened by the presence of celebrities such as Daniel Mananta, Olivia Jensen, and others.

George Djuhari

I was a donor for Habitat for some time. Through the time, I felt that it has been such a perfect fit for me. It allows me to volunteer together with my family to build houses for many first time homeowners. I really believed in the importance of family values, and having your own home is such a significant step in providing for your family. I really feel connected with the values and mission of Habitat for Humanity. To be able to see the houses built and the smile and happiness that brings people, really touches my heart.

28UILD

Aku Bangun Indonesia (I Build Indonesia)

28uild.id is a national movement that has been carried out by Habitat Indonesia since 2012. This movement aims to build the spirit of the community, especially young people, to work together to create decent homes for underprivileged people, under Habitat's vision and mission. In 2019, the 28uild with the theme "I Build Indonesia", was held simultaneously on October 28, right on the commemoration of the Youth Pledge, in 4 cities, namely Jakarta, Batam, Yogyakarta, and Surabaya. More than 500 volunteers built or repainted houses belonging to underprivileged communities and more than 200 media exposures captured this activity. The hope is that in the post-Covid-19 pandemic, 28uild can return to embody the spirit of cooperation that creates change for Indonesia, starting at home.

Mona Cellyda R.H., Marcomm Manager J.W. Marriott Hotel Surabaya

Marriott Hotel Surabaya is very satisfied working with Habitat Indonesia because, through this partnership, JW Marriott has gained the experience to share with trusted partners. Moreover, Habitat for Humanity provides maximum service and assistance for donors so that they can have the opportunity to carry out charity for disadvantaged people on a targeted basis. Habitat Indonesia helps JW Marriot Hotel Surabaya to achieve its social mission by providing information about disadvantaged families so that JW Marriott can provide maximum assistance by building livable houses.

Global Volunteer

Global Volunteer

In the Global Volunteer program, cross-country volunteers who are accompanied by Habitat for Humanity from their respective countries are invited to work together, build houses for underprivileged families in Indonesia. Global Volunteer is not only an activity of raising donations and building houses but more than that, there is an exchange of social values, culture, and local wisdom which becomes a memorable experience, both for every volunteer who comes and for the local community. Throughout the 2020 Fiscal Year, from July 2019 to June 2020, there have been 188 volunteers involved in building houses in Batam, 72 volunteers in Yogyakarta, and 120 volunteers in Jakarta. This series of Global Volunteer activities continues to inspire the local communities visited, in promoting close family values, among nations. That's why this activity is sustainable from time to time.

Giving for Giving

#IndonesiaAgainstCorona

Giving for Giving is a virtual volunteering activity carried out during the Covid-19 pandemic when Habitat Indonesia was unable to carry out activities with volunteers at the project site. This activity invites young people from various parts of the world, to give their time and abilities to become teaching staff for other young people who are willing to donate to support the Medical Fighters Shelter Program. There are two Giving for Giving activities, the first is a foreign language learning class, namely English, Spanish, Swahili, Mandarin, Korean, French and Indian, and the second is a class to learn salsa dance. Giving for Giving builds the enthusiasm of young people to continue to do good in this pandemic, even though they cannot meet physically. More than 30 young people from Indonesia, Germany, Kenya, and other countries, contributed to this virtual activity. Giving for Giving will continue until December 2020.

Sara, Spanish Native

I'm from Spain, I'm involved in Giving for giving language is pronoun, teaching spanish online to all hole desire. I have to say, it's been beautiful experiences, it is wonderful to see how much young peoples are motivated to learn.

Leadership Academy

Aku Bangun Indonesia (I Build Indonesia)

Unlike what Habitat Indonesia did in 2019, where at that time we had organized a Leadership Academy for 95 youth in Jakarta and Bangka Island, this year, we were forced to cancel the training for young people in Surabaya and Yogyakarta, because of the Covid-19 Pandemic. Habitat Indonesia initiated this Leadership Academy together with the Center for Creative Leadership to transform the perspective of young leaders to be sensitive and able to respond to social issues around them. Through the sustainable community method, young people are invited to be able to think critically and act efficiently in arranging projects in their community. Using the SBI method, young people are invited to be able to collaboratively communicate problems and changes they want to see in the community and be able to direct themselves to realistic solutions.

dukunghabitat.org

Aku Bangun Indonesia (I Build Indonesia)

Entering its 23rd year of carrying out its vision and mission in Indonesia, Habitat Indonesia as a non-profit organization that carries out the construction and repair of decent and healthy homes, targets 100,000 underprivileged families, by 2021, as beneficiaries. Therefore, adhering to the spirit of “building a world where everyone has a decent place to live”, Habitat Indonesia introduces a new way for people to donate through the digital platform “dukunghabitat.org” which was launched right on Valentine’s Day 14 February 2020 at the lobby of Menara Sentraya. , South Jakarta. With the theme “Kado Cinta Habitat”, on that day everyone who donates can convey an expression of affection to their loved ones through digital messages. Every donation collected through this platform will be used to finance the construction of livable houses, provision of sanitation facilities, and access to clean water for underprivileged people. With this digital donation platform, the community is invited to participate in supporting Habitat’s vision and mission, to build Indonesia into a decent place to live for everyone.

Indonesian Masters

Aku Bangun Indonesia (I Build Indonesia)

The Indonesian Masters is an annual tournament for professional golfers held in Jakarta since 2011. This tournament is one of the tournaments in the Asian Tour series. Habitat Indonesia is the chosen Charity Partner, every year it is held. From 2011 to 2017, through donations obtained from this tournament, Habitat has implemented 15 projects to build houses and clean water facilities for underprivileged communities in Bogor, Depok, Medan, Teluk Bango Village, and Batujaya. From the 2018 Indonesian Masters, Habitat has built 31 temporary shelters (shelters) for victims of the earthquake and tsunami in Palu.

At the 2019 Indonesian Masters which was held at the Royale Golf Club Jakarta on December 10-15 2019, the Habitat booth was present, inviting golfers and visitors to donate through games, bricks of hope, merchandise sales, and so on. Through the support of professional golfers who competed at that time, such as Danny Masrin, Berry Henson, and Wolmer Murillo, as well as amateur golfer Kentaro Nanayama, from the Indonesian Masters, this time Habitat managed to collect more than 170 million rupiahs in donations which will be used to build livable houses for the less fortunate community.

Danny Masrin

2018 Indonesian Masters was the first year that I can recall Habitat having a more active role in the tournament and using the tournament as an opportunity to bring awareness and fundraising at the same time. It was during this 2018 tournament that some other golfers and myself decided to donate money for every birdie we made. I have been a part of helping to raise funds for Habitat since I was in High School. Giving back is something I enjoy doing and after witnessing first hand, the experience of building someone else's home with them, it is truly an eye opening experience that sometimes we take for granted. Being able to raise money for people who do not have a sustainable home is something that I think is very important, and to be able to fundraise doing what I love, play golf, makes it even better!

Habitat Indonesia Development Council

The Indonesia Development Council (IDC) was formed by Habitat Indonesia on January 16, 2020, at its first meeting at Crazy Uncle Restaurant, Jakarta. Each IDC member has an extensive network with company owners and high government officials, so it is hoped that they can help Habitat Indonesia to raise funds. The function carried out by IDC is to provide direction in the formulation of long-term strategies, development of sustainable resources, and building networks with potential donors. Jimmy Masrin and Edwin Soeryadjaya were selected as IDC patrons. Other IDC members are Fofa Sariaatmadja, Hilmi Panigoro, Kwik Wan Tien, Shirley Tan, Alan Lau, Jens Reisch, George Djuhari, Ir. Rene Widjaja, and Lucye Kwee. Since April 2020, Habitat Indonesia launched the Shelter for Medical Fighters program, and IDC members have contributed 46% of the total donations collected to support the program. Apart from supporting the Habitat program in responding to the Covid-19 pandemic, IDC members are also committed to developing Eastern Indonesia, namely the Province of East Nusa Tenggara. One of the ways to raise funds by IDC is through the “Birthday Build” program.

Market Development

Habitat Indonesia Supports Its Partners To Provide Access For The Community To Have A Decent Place To Live

Committed to making a world where everyone has a decent place to live and creating an empowered, prosperous, and independent society, Habitat Indonesia collaborates with the Mitra Dhuafa Cooperative. KoMiDa provides loans for home renovation, toilet repair, and business development to low-income people. In its support, Habitat is present as a consultant who helps develop renovation financing products and provides training for partners to assist the community in planning house repairs, monitoring, and completing the construction process for loan recipients. This matter aims to optimize a fairly limited development fund. In carrying out this program, Habitat and Koperasi Mitra Dhuafa prepare a market research plan,

product design development, and piloting, launching home renovation loan products with larger scale, involving more branches. Besides, Habitat also uses every opportunity to conduct training for the community to build a community that has the ability and becomes more empowered for their lives.

From 2017 to the end of December 2019, KoMiDa has distributed loans to around 2,872 families in 59 branches, channeling most of the loans in West Java, such as Bogor, Karawang, Cianjur, and Subang. This program is implemented by Habitat as a form of support to create communities that have decent, prosperous, and independent homes so that they have a better life.

A woman wearing a beige hijab and a matching ruffled top is smiling broadly. She is standing in a grocery store, with shelves of various packaged snacks and products visible in the background. The lighting is bright, and the overall atmosphere is positive and welcoming.
