Dear Ladies and Gentlemen,

My humble greetings to all of you

First, let us thank God Almighty, who always accompanies our life and ministry at Habitat for Humanity Indonesia. The fiscal year 2022 is special for all of us because it commemorates 25 years of Habitat for Humanity Indonesia. It takes a lot of work to get to this point. Various challenges have been faced in providing adequate housing for low-income families. Thank God there is always a way out during challenges, even if it becomes an opportunity to create new ideas and creativity in implementing each program. I am delighted that we can return to the building and painting houses with volunteers this year since the last two years ago due to the Covid-19 pandemic. This activity will be a good start to continuing routine house-building activities as we did before.

I was very impressed and grateful for my involvement in being able to take part in building and painting houses with volunteers and CEOs in Banyuwangi on August 13, 2022. This activity rekindles the enthusiasm to declare a humanitarian mission to help low-income families get decent housing because a decent life is everyone's right. Hopefully, the spirit will continue in the new fiscal year, and more programs can be carried out to help more families in need.

Best regards,
Rene Indiarto Widjaja
**Vision**

A world where everyone has a safe and decent place to live

**Mission**

To bring communities together to help families build strength, stability and self-reliance through shelter

For 25 years, Habitat Indonesia has built in 17 Provinces in Indonesia.
Dear friends, donors, partners, and Habitat volunteers,

Our gratitude goes to God Almighty, who has brought Habitat so far to the age of 25. We are grateful that for 25 years, Habitat for Humanity Indonesia (Habitat Indonesia) has served 181,470 families (725,880 individuals). In 25 years, Habitat has built 38,169 decent houses, 24,449 sanitation, and access to water. Habitat Indonesia works with the Mitra Dhuafa Cooperative (Komida) to provide housing repair and sanitation loans to 48,553 families. This result still needs to be added to the number of low-income people in Indonesia, 27.5 million (Central Bureau of Statistics March 2021). During the fiscal year 2022 (July 2021 to June 2022), Habitat Indonesia built and repaired 2,665 livable houses (including sanitation and water access). Habitat Indonesia also provides 25 public facilities. Habitat not only works with the community with various physical developments but also offers non-physical programs for the community through various types of training.

Habitat has provided construction training and a clean and healthy lifestyle to 2,260 people. Not only regular program, but Habitat is also always responsive to every disaster through various disaster response programs. Habitat assisted several areas in the disaster response program last one year, including Palu, Semeru, Mamuju, and NTT. Entering fiscal 2023, we want to become stronger and more resilient by promoting mutual cooperation to overcome any crises or challenges that confront us in the future. Together, Let's build Indonesia.

Best regards,

Susanto

Fiscal Year 2022
Donor Testimonials
Caterpillar Foundation is proud to support hundreds of organizations worldwide that invest in land and water conservation to help create a more sustainable world. This is included our partnership with Habitat for Humanity Indonesia, which served very professional partnership.

**Budi Irianto**  
Director Government and Corporate Affairs - Caterpillar Indonesia

Herbalife Nutrition and the Herbalife Nutrition Foundation (HNF) are very grateful to partner with Habitat Indonesia. We were looking for a partnership to work on the construction of sanitation facilities in Kedungdalem Village – Mauk, Tangerang. We met the HFHI team for the first time in 2018. In 2019, we officially launched our partnership and completed the 2021 phase 1 sanitation project. We can see that the Phase 1 Sanitation Project has succeeded in producing extraordinary results and impacts, and there have been positive changes in behavior among the Mauk community. We continued the partnership for the Phase 2 project in Mauk, and it will be completed in 2022.

We are very grateful for this partnership and wish Habitat for Humanity Indonesia many years of success. We hope this partnership will continue because one of our missions is to provide good nutrition and access to clean water for many people in need. Ms. Anna, Mr. Nobel, Mr. Bayu, Mr. Nico, and Ms. Veronica are some Habitat Indonesia team members who constantly work closely with the Herbalife Nutrition Indonesia team in the field. They always help answer our questions, requests, and advice during the partnership.

**Intan Pratiwi Darmawanti**  
Head of Corporate Communications  
Herbalife Nutrition Indonesia
On behalf of the Management of PT KRAKATAU POSCO, I would like to thank and appreciate Habitat for Humanity for their commitment to successfully implementing the POSCO Steel Village Project for the people of Cilegon City. The program has been implemented since 2018, with all the hard work, amid the most challenging situation, the COVID-19 pandemic. This steel village project symbolically represents POSCO Group’s Corporate Citizenship spirit to grow with the community. The implementation of the project is a form of PT KRAKATAU POSCO’s commitment and responsibility to providing the best contribution to the people of Cilegon. We also thank Habitat for Humanity for closing the project by completing the Graha POSCO Community Learning Center construction, which is expected to fulfill its strategic role in changing people’s behavior in supporting sustainable development in the city of Cilegon. Empowerment and cultural activities for the community with the aim that they are ready to face socio-economic challenges.

House building is the basic foundation for living in Korea and worldwide. The Samsung Village project plays an important role in helping people in need around the village. The Samsung Village project is planned to realize the dream of happiness in a safe and comfortable home. We have continued the Samsung Village project with the aim of creating a healthy life through clean water, sanitation facilities, and a home where children can have a bright and limitless future. Therefore, it is clear that Samsung is fortunate to work with Habitat for Humanity Indonesia.

Thank you for contributing to the transformation and development of a good society and for your dedication and hard work in Samsung Village. Samsung C&T hopes that Habitat Indonesia can continue to develop and prosper in the future.

Ms. Jaeboon Shim
Professional, Samsung C&T
Village Improvement Program
Prudential Village Improvement Program Phase 1

HFH Indonesia and Prudential Indonesia work together to achieve common goals through the development of the following programs:

- Construction of new decent houses and toilets
- Construction of clean water access units
- Road access construction
- Drainage construction
- Conduct clean and healthy living behavior training for people
- Conduct Basic Construction and Healthy Home Training

Fiscal Year 2022
Prudential Village Improvement Program Phase 1

HFH Indonesia and Prudential Indonesia work together to achieve common goals through the development of the following programs:

1. Distribution of life necessities packages
2. Distribution of Hygiene Kit packages
3. Installation of portable hand washing facilities
4. Development of PAUD school (Pre-school) (additional)
5. Installation of portable hand washing facilities (additional)
6. Providing educational information materials about COVID-19

Location: Buaran Asem, Tanjung Anom Village

Project Duration: February 2020 – April 2022

Total Beneficiaries: 3,070 individuals

Total Beneficiaries: 5,550 individuals

Fiscal year 2022
WASH (Water, Sanitation & Hygiene) Program
The Clean Water Access Program in collaboration with Habitat Indonesia and the Caterpillar Foundation was implemented in Bojong Koneng Village, Babakan Madang District, Bogor Regency, West Java, and Kampung Tua, Tanjung Riau Village, Sekupang District, Batam Island. This project took place in 2020-2021 with the theme of the Clean Water Access Improvement program.

**Access to Clean Water**

The Clean Water Access Program was implemented in two locations:

- **Bojong Koneng Village, Babakan Madang District, Bogor Regency, West Java**

  The clean water access program implemented in Bojong Koneng Village, Babakan Madang District, Bogor Regency, West Java Province, Indonesia, has supported 346 low-income families. The families come from Gunung Batu Kidul Village, Bojong Gaok Village, and Kampung Sudi. Water sources are taken from mountain springs to get clean water directly to their homes. A good lesson from this project is implementing a water meter system in the beneficiaries’ homes.

- **Kampung Tua, Tanjung Riau Village, Sekupang District, Batam Island**

  The access to clean water program implemented in Kampung Tua, Kelurahan Tanjung Riau, Batam Island, Indonesia, supports 120 low-income families to get clean water. Habitat Indonesia is working with water connection partners to provide access to water managed by the BP Batam Clean Water Company (SPAM).
Fiscal Year 2022

Water Access

Sanitation
"Alhamdulillah, we are grateful to be assisted by Caterpillar and Habitat Indonesia in our village. The water debit is now getting bigger. I hope this water source will run smoothly so that all residents in our village will not experience drought again."

- Mr. Encep (44 years old)

Thank God now my family has its own clean water connection. I no longer need to carry a bucket, so I can have a good rest after coming back from fishing. Moreover, I was pleased that we received a barrel of water, the storage to ensure we never run out of water."

- Mr. Kadir

“My daughter and I are very grateful for this help. We do not want this water problem to continue and affect my grandson’s growth.”

- Mrs. Nursyida
Kupang & Lembata
Disaster Response Program

Disaster Affected Homes
**Tropical Cyclone 26S (TC SEROJA)** hit Indonesia, Timor-Leste, and Australia in early April 2021. The storm formed over the Savu Sea (the eastern part of Indonesia, bordering with Timor-Leste) on April 1, 2021, moving southwest toward the Australian coast. TC SEROJA hit Indonesia at tropical storm level with wind speeds of a minimum 65km/hour and a maximum wind speed of 100 km/hour, with an average wind speed of 85 km/h (WMO Information System, Bureau of Meteorology). National Agency for Disaster Management (BNPB), as of April 20, reported that the number of fatalities (dead) had increased to 181 cases, in which there were also 26 people missing, 184 people injured, and more than 50 thousand evacuated. In addition, 14,410 houses were heavily damaged, 12,059 houses were moderately damaged, 50,627 houses were lightly damaged, and 3,039 public facilities were destroyed. In responding TC Seroja disaster, Habitat for Humanity Indonesia in collaboration with Human Initiative in Lembata District and Wahasa Visi Indonesia in Kupang District.

**Response to a tropical cyclone in Kupang & Lembata**

- 121 Permanent Homes
- 20 Decent Home Improvements
- 73 Temporary Shelter
- 27 Shelters that can store rainwater
- 2 Units of clean water points for 100 families
- Capacity building for:
  a. 202 people in “Build Back Better” Training
  b. 100 people in Waste Management Training
  c. 155 people in CBDRM Training
- 8 Private Toilets
- Distribution for Emergency Response
  a. 121 emergency shelter packages
  b. 57 community shelter packages
Advocacy and coordination during program implementation and evaluation

Habitat Indonesia coordinates with local governments in program implementation. During the evaluation workshop on 15 July 2022, the Regional Secretary of Kupang Regency and related stakeholders (Settlement Office, Head of Oesao Village, and BPBD of Kupang Regency) represented the government.

Testimony

“Thanks to the great people involved in this program, the donors, and Habitat Indonesia. We used to live in the downstairs house (previous location), and there was always the fear of flooding. Our walls were made of wood, but now the house has glass walls; it looks very luxurious. Before, there were no glass windows, and now there are; the doors and materials used are great for building a house. Thank you for the great people that God uses to distribute blessings. God is with us.”

- Theresia Padakari
Construction of 73 T-Shelter units

A total of 73 families benefited from temporary housing in Amakaka Village.
“Thank God, now I have a perfect temporary shelter with the help from the Habitat Indonesia and Human Initiative. The shelter I now live in feels safer and more comfortable, even when it rains heavily. My child no longer feels anxious because he does not see water coming into the house, and in fact, my child prefers to live in the temporary shelter rather than return home to the village. Thank you so much. I do appreciate Habitat Indonesia and Human Initiative and all the good people who helped build a shelter for my child and me, who lived in the cottage with all the limitations. I feel so happy to be able to live in a beautiful temporary shelter as it is now.”

- Safe and Comfortable Housing for Mrs. Maria Kewa and her Family

**CBDRM (Community Based Disaster Risk Management)**

CBDRM is carried out to increase public awareness of threats and risks in their residence area so that the community can take appropriate precautions to reduce risk. Before the activities in the village, Training for Trainers was conducted for prospective Facilitators and the Amakaka Village Disaster Preparedness Team. There were 155 CBDRM training participants, 77 male and 78 female participants, which can be built shelters (Temporary Shelter).
Central Sulawesi Disaster Response Program
PROJECT ACHIEVEMENT
(September 2018 - December 2021)

1039 Temporary Shelter
Helped 512 Families in Sigi Regency and 527 Families in Donggala Regency

191 Permanent Houses in Sigi Regency

683 public toilet beneficiaries
383 in the city of Palu and 300 in Sigi Regency

330 Individual Toilets
Supported 96 families: 7 in Sigi Regency and 323 in Donggala District

536 packages of health equipment
Supported 536 families in Sigi Regency
15 Packages of Communal Equipment for Cleaning Ruins of Buildings

406 packages of Emergency Shelter Supplies
Supported 406 families in Sigi District

558 sheets of tarpaulin
in collaboration with UNHCR and Wahana Visi Indonesia, supported 349 families in Sigi District

6 Water Filtration System
Supported 711 families: 497 in Sigi District and 187 in Donggala District

Fiscal Year 2022
Rehabilitation and Reconstruction Program (September 2018 - December 2021)

15 tools to Eliminate Ruins
supports 150 Families: 70 in Sigi District and 80 in Donggala District

Training to Build Back Safer
"Mothers as Construction Pioneers" (only for mothers): 172 Pax
Build Back Safer training for the public: 289 Pax

Health Promotion Training
for 536 participants in Sigi Regency

Reconstruction
2 Schools in Sigi Regency

Community Based Development Approach

Survey and Assessment → Program Socialization and Requirements Identification → Establishment of Development & Alignment Program committee → Family Selection from Committee Recommendation

Implementation of Development Program ← Social Contracts forming with Community ← Finalization of Beneficiary List ← Public Test

Support Mothers “BukaLapak”

Dukung Pengusaha Mikro Menafkahi Keluarga di Masa Pandemi

melalui pelatihan dan pemberian bantuan usaha tunai
The Covid-19 pandemic has affected the economic life of the Indonesian people. The most challenging impact was when many families lost their income. On the other hand, the cost of living tended to increase, partly because of the cost of buying internet quota and the cost of procuring online work and study facilities such as laptops or cellphones. Not to mention the cost of daily meals, which has also increased due to rising prices for food needs in the market. Therefore there was no other choice. Many of them who were housewives had to struggle to make a living independently and became entrepreneurs online to survive. Unfortunately, many needed more time to become entrepreneurs due to a lack of the required skills and knowledge.

From this condition, Habitat for Humanity Indonesia (Habitat Indonesia), with the help of donations from good people, in collaboration with Infina, KelarBos, and Bukalapak, held Entrepreneurship Training for mothers affected by the Covid-19 pandemic. The training aimed to improve their skills to become entrepreneurs, selling online, to survive during this pandemic.

The Entrepreneurship training includes Practical Tips for Selling on the Marketplace and Social Media, KelarBos Operations, and Bukalapak On-Boarding, where Bukalapak provides information and explanations on how to become a pelapak (seller) and to use promotions tips & tricks.

Concert and Auction for East Nusa Tenggara

by Ananda Sukarlan
Tropical Cyclone Seroja hit East Nusa Tenggara Province on April 3, 2021. This cyclone caused flash floods and landslides in East Nusa Tenggara (NTT) areas, such as Kupang City, and several surrounding regions/districts. This sea storm, the first time experienced by the people of Indonesia, hit so violently that it destroyed various buildings and public facilities. Thousands of families fled because they lost their homes. They must struggle to live in huts or refugee camps with very minimum facilities.

Habitat for Humanity Indonesia initiated to help survivors of the Tropical Cyclone Seroja disaster in Oesao Village and Nibonat Village in Kupang Regency and Amakaka Village in Lembata Regency to quickly recover from this disaster and be able to return to normal life by building decent housing, including access to clean water and community empowerment programs.

Collaborating with world-renowned pianist and composer Ananda Sukarlan and several young Indonesian musicians, Habitat Indonesia held a piano recital to encourage many people to support the rebuilding of NTT after Tropical Cyclone Seroja. The piano recital with the theme “NTT adalah kita” (NTT is Us) was broadcast virtually via the Vidio and Berita Satu channels on August 6, 2021. The public can also watch via the paid platform on Loket.com from August 7 to 15, 2021. In celebrating the 76th Indonesian Independence Day, the ‘full concert’ broadcasted again for free on the Vidio channel on August 17, 2021. From all channels, this piano recital managed to reach 5,775 viewers. The donations collected were used to build 12 houses, access to clean water, and community empowerment programs for survivors of Tropical Cyclone Seroja.
Habitat for Humanity Indonesia and Maestro Pianist Ananda Sukarlan held the “Song for Hope” Charity Auction at Soehanna Hall, Jakarta, on October 29, 2021. The event began with a solo piano performance by Ananda Sukarlan, who performed four songs, Variation on Ibu Pertiwi, A song for Papua, Three pieces from Alicia’s Piano Books, and Two Short Poems of Mario F Lawi. Then three songs were auctioned: Ibu Sud’s Pergi Belajar (Go to Study), Rapsodia 35, and “Sinar itu Dekat” (the light is near), performed by Ananda Sukarlan together with pianist Michael Abimanyu Kaeng and baritone singer Kadek Ari Ananda. The auction was used to build 9 permanent housing units and organize “Build Back Safer” training for survivors of Tropical Storm Seroja in NTT.

**Purpose and Result of Auction Concert**

Holding a fundraiser through a Charity Concert with Ananda Sukarlan, the funds were used to rebuild Lembata and Kupang District. The auction obtained in the event was used to build 9 permanent housing units and organize “Build Back Safer” training for survivors of Tropical Storm Seroja in NTT.
In collaboration with the Indonesian Chamber of Commerce and Industry and Trisakti University, Habitat for Humanity Indonesia held the Indonesia Housing Forum 2021 on October 14, 2021. This biennial event was held for the third time after the same forum in 2017 and 2019. The Indonesia Housing Forum 2021 was part of the 8th Asia Pacific Housing Forum series. Since it was still during the pandemic, this event was being held virtually (online).

This event aimed to promote innovation and create collaboration between parties to formulate policies to increase access to safe, decent, and affordable housing. Indonesia Housing Forum 2021 came with the theme “Building Inclusive Housing for a Better Future”. It involved all stakeholders in the housing sector and other related support sectors.

The Indonesia Housing Forum 2021 was started by several keynote speakers, including the Indonesian Minister of Public Works and Housing; Basuki Hadimulyono, Chairman of the Indonesian Chamber of Commerce and Industry; M. Arsjad Rasjid PM, Chancellor of Trisakti University; Kadarsah Suryadi and National Director of Habitat Indonesia; Susanto Samsudin. The 13 speakers presented various interesting topics guided by four moderators. It succeeded in attracting more than 400 people attending from multiple backgrounds, from government, academia, corporations, communities, and the public.

Temporary Shelter for Medical Workers Program 2.0
In early March 2020, the COVID-19 pandemic hit the world, including Indonesia. Within three months, the number of infected patients increased to more than 56,000. Apart from the general public, those who must lose their lives were health workers who came face to face with the virus while caring for sick people. Besides, they also had to bear the negative stigma and even rejection when they returned home or boarding house. People worried they would transmit the virus to their family and closest people. They also had to rest in the Hospital by maximizing the facilities.

Habitat for Humanity Indonesia launched the Temporary Shelter for Medical Workers Program (TSPM) to help health workers who have been struggling against the Covid-19 virus since April 2020. This program provided medical workers with a proper, safe, and comfortable place to rest so they could continue their tasks in good condition the next day.

**Temporary Shelter for Medical Workers Program 2.0**

**Daily packages to medical workers:**

- 1 bedroom for 2 workers
- 2-times meals for 2 workers
- Transportation (round trip) from Hospital to hotel
- Room sterilization

**2,100 NUMBER OF MEDICAL PERSONNELS WHO GOT TEMPORARY SHELTER (April 2020 - June 2022)**

**12**
NUMBER OF HOSPITALS ASSISTED BY THIS PROGRAM IN 3 PROVINCES

**24**
NUMBER OF HOTELS ASSISTED BY THIS PROGRAM IN 3 PROVINCES
"I am very grateful for this shelter. If there were no shelters, I would have to look for a place to live. It would be hard, especially since I do not have a family in Jakarta. On the other hand, this shelter also helps me prevent virus transmission in public places that I might bring from the hospital. This shelter is very comfortable and not noisy. Thank you to Habitat Indonesia and Pfizer for helping us health workers. I hope that we are all healthy, Indonesia will recover quickly, and the donors will always be healthy and successful," said Riswanto with emotion.

"I appreciate the contribution of Habitat Indonesia and Pfizer in handling this pandemic by providing proper resting places for health workers. The place helps a lot, especially for me as a volunteer who came from out of town and did not have a family in Jakarta. If there had been no shelter earlier, I would have had to find a house close to the hospital, or I would have rented a boarding house using personal funds. I hope that Habitat Indonesia and Pfizer will continue to succeed and get bigger in the future. Hopefully, this assistance will be a blessing", said Muhammad Nur.
Habitat Charity Golf Tournament 2021
Habitat Charity Golf Tournament has been a biennial event since 2010 for Indonesian golfers to compete while doing charity work and donating to support housing for underprivileged communities in various regions in Indonesia. After being delayed due to the pandemic, Habitat Indonesia again held the Habitat Charity Golf Tournament (HCGT) on December 15, 2021, at Imperial Club Golf Karawaci. This time, HSBC Indonesia Bank became the main sponsor of the HCGT 2021 event. The participants were given two choices: donating to support the construction of new houses or house renovation.

François de Maricourt, President Director of PT Bank HSBC Indonesia, said, “HSBC is committed to supporting sustainable economic and community development in Indonesia. We are pleased to be able to support Habitat for Humanity Indonesia in building decent houses for the people of Mauk, Wringinanom, and Babakan Madang, as a form of our commitment to Indonesia.”

HCGT was attended by 122 golf players from various business circles who managed to collect donations to build and repair 22 houses in Mauk, Babakan Madang, and Wringinanom).
Charity Fashion show 2022
Habitat for Humanity Indonesia collaborated with Alleira Batik and The Sultan Hotel & Residence Jakarta to prevent stunting in Mauk Tangerang. The fashion show entitled “Fashion for Hope” presented the wives of ambassadors from several countries, members of the Women International Club, and socialites as fashion models who displayed elegant batik clothing from the Alleira collection. Apart from enjoying the stunning looks of the models on the runway, the guests also had the opportunity to buy Alleira Batik. The sales resulting from this event were used to build toilets and provide access to clean water in Mauk, Tangerang, to prevent stunting there.

The Charity Fashion Show could be enjoyed live by the guests who attend Kudus Hall, and the public could also enjoy the event, which is live broadcasted via Vidio. Indonesian batik lovers could contribute to supporting stunting prevention in Mauk, Tangerang by buying Alleira products, which were also offered through an e-catalog until April 20, 2022. This event was also expected to increase people's admiration for Batik, which in 2009 was designated a “heritage of humanity” by UNESCO. It is truly the cultural heritage of our ancestors that we should preserve.
Global Platform for Disaster Risk Reduction (GPDRR) Bali
1  Attending and speaking at Stakeholder Forums in the session: Lessons learned in Building Resilience-Over the past 3 years

The Stakeholder Forum brings together various stakeholders worldwide, providing an opportunity to share experiences and knowledge on different approaches to building disaster-resilient communities. Discussions focused on strengthening collaborative and community approaches in coherently implementing the Sendai Framework with other relevant frameworks, such as the 2030 Agenda for Sustainable Development, the Paris Agreement, and the New Urban Agenda.

2  Supporting Habitat Indonesia at side events: Indonesia Resilience Stage

At this event, Habitat for Humanity Indonesia was represented by Mr. Susanto, the National Director, and Dr. Anton Wardaya from Wardaya College. They conveyed how to involve youth in disaster preparedness and response by increasing their awareness of disaster trends influenced by businesses that cause climate change. Habitat Indonesia supported a youth group from Wardaya College to design a project to raise donations for capacity building. The aim was for families to become disaster-resilient and to increase their preparedness capacity to face future disasters through PASSA (Participatory Approach of Safe Shelter Awareness).
Bangkit Build
2022
Commemorating National Awakening Day and celebrating its 25th anniversary, Habitat for Humanity Indonesia was again holding volunteer build after being stopped for the last two years due to the Covid-19 pandemic. Volunteers Build activities with the theme “Rise! Together to Build Indonesia” was carried out by simultaneously painting the houses of low-income families in three places in Indonesia; Mauk-Tangerang, Gresik-Surabaya, and Kulon Progo-Yogyakarta.

The Volunteer Build activity, held on Saturday (June 11, 2022), was part of a series of build activities commemorating the 25th anniversary of Habitat Indonesia, which continued until December 2022. Volunteers Build, one of the main pillars of Habitat Indonesia’s humanitarian mission, was always held annually before the pandemic. The aim is to build volunteers’ awareness of the importance of adequate housing and to evoke their interest to contribute to its provision. Volunteer Build activities include foundation construction, painting, and walling. This time, the Volunteers Build activity focused on painting 79 houses involving 327 volunteers from various backgrounds, such as employees, students, artists, and entrepreneurs. Five Key Influencers also enlivened the house painting activity in Mauk. They were Han Chandra (model/artist), Josh Kunze (singer), Matthew Gilbert (model), Okky Alparessi (model), and Nadia Tjoa, Miss Face of Humanity 2022.
Painting the houses by volunteers also aims to create a tidier, more beautiful environment and to build community awareness about the need to keep their homes clean. This activity also embodies the spirit of national revival by bringing hope for a better life in the future for the pre-prosperous community.

On the same occasion, Habitat Indonesia also launched its newest program, building houses using bricks produced from recycled plastic waste. The launch was marked by constructing of the first house using these bricks. Development with an environmentally friendly concept is to suppress the extreme climate change that often hits Indonesia as a tropical country. It is expected that the houses built by Habitat Indonesia will use these bricks in the future.
Indonesia Development Council 2022
Habitat for Humanity Indonesia saw the need to form an Indonesia Development Council to provide advice and actions as a consulting council whose members are High Net-Worth Individuals (HNWI) whose aim is to spread and continue Habitat Indonesia’s vision and mission. IDC, officially formed in January 2020, has supported and distributed assistance through Habitat Indonesia programs.

**Founder Members**

Four committed leaders initiated this council: Jimmy Masrin, George Djuhari, Edwin Soeryadjaya, and Kwik Wan Tien. Then, the other members joined: Hilmi Panigoro, Fofo Sariaatmadja, Shirley Tan, Lucye Kwee, Jens Reisch, and Rene Widjaja.

**Activities and Programs**

For a year, starting from July 2021 to June 2022, IDC has contributed significantly to the event's success and the Habitat Indonesia program's sustainability. Hilmi Panigoro, Edwin Soeryadjaya, Jimmy Masrin, and Fofo Sariaatmadja supported Habitat Charity Auction, Song for Hope. This event helped build 16 houses in East Nusa Tenggara, which were affected by Tropical Cyclone Seroja. Habitat Charity Golf led by Jimmy Masrin and supported by Edwin Soeryadjaya and Fofo Sariaatmadja. This event raised donations to build and repair 22 houses in Mauk, Babakan Madang, and Wringinanom. Habitat Charity Fashion Show – supported by Kwik Wan Tien and Lucye Kwee, Habitat Indonesia increased exposure to socialites so that it helps spread Habitat’s vision and mission.
Youth Program

Local Volunteers Build Youth Social Entrepreneurship
Local Volunteers Build

Habitat for Humanity Indonesia provided a platform for volunteers to gain experience in joining directly with the beneficiaries. The goal is to give chances to the participant to feel the enthusiasm, happiness, and impact felt by the beneficiaries family. Then, the participants can share the experience with other young people to gain awareness of existing social issues.

Youth Social Entrepreneurship

The younger generation has a myriad of potentials, insights, and a broad network, which is also supported by technological advances and the power of social media. One of the positive impacts of social media is the broad market that can be reached by the younger generation when they want to do good things. This fact can be seen in the youth working together as groups or institutions with Habitat for Humanity Indonesia. With their creativity, they carried out various fundraising projects to support Habitat for Humanity Indonesia’s mission. The experiences, values, and challenges also positively influenced them. Habitat for Humanity Indonesia had a role in providing space and mentoring the project they joined.
Hydrodozer for Clean Water

In early 2022, Austin Ho and Noah Simanjuntak, still in junior high school at the Jakarta Intercultural School then, collaborated with Habitat Indonesia and Amazon Web Services to bring clean water at home at low prices to Indonesia. Over two months, the project has successfully installed and maintained clean water systems in two communities in Karawang, a small town two hours from Jakarta. Austin has built a device called the Hydrodozer, a low-cost system that adds chlorine to the water to kill harmful bacteria, designed by a research team at Cornell University.

This system is in line with the WASH (Water, Sanitation, and Hygiene) intervention program, and we are happy to support the installation of this system in partner communities. After Hydrodozers were installed in two villages in Karawang, Austin and Noah faced many challenges, from finding special equipment to overcoming communication gaps. The success of this project was due to the team's determination and creativity. They were excited to continue collaborating with Habitat Indonesia to provide clean water for all with Hydrodozers. This activity can influence the community together, proving that age does not limit the potential of young people to build a better world.

Anatman Pictures:
Documentary Movie for Menstrual Hygiene

Volunteer support is broader than only construction activities and disaster response support. Two young filmmakers took their time to make a documentary video that can provide education regarding young women's reproduction and the importance of clean and healthy sanitation in the WASH (Water, Sanitation and Hygiene) program. By involving the families of beneficiaries of the Habitat for Humanity program in the Sentul Cluster as subjects, the documentary video entitled “Datang Bulan” has successfully participated in several national and international film festivals.
Market Development
Luluk Indasari (Mr. Samuji’s Wife) is a member of the KOMIDA (Mitra Dhuafa Cooperative) Sumberrejo Branch and has been a member for more than 9 (nine) years. Knowing there was financing for home and business renovations, Luluk Indasari’s husband was interested in applying to renovate his repair shop, which had almost collapsed and the roof leaked when it rained. The repair shop has been around for a long time, since 18 years ago, but was only built using wood and bamboo.

Luluk Indasari opened a small shop with her husband to support their family with 2 (two) children. After negotiating with her husband, Luluk Indasari proposed funding of IDR 10,000,000 for a period of 3 (three) years. Supported by a good record of achievement, the survey process up to the financing ran smoothly. With one builder and one builder assistant, the building construction took approximately 3 (three) weeks. The initial plan was to use wood as the main material. But due to long-term considerations, they decided to build a permanent building. The budget increased by IDR 5,000,000, which came from personal funds. With the completion of the new repair shop, Samuji is now more comfortable working because he is no longer worried that the workshop will collapse and leak. He has become more enthusiastic and productive, trying to keep financing commitments running smoothly for long-term goals.
